

Habit Helper

by *Stanislav Delyukov & Sviatoslav Fediaev*

team 17

A hand is shown from the top, placing a wooden block onto a stack of three blocks. The blocks are arranged in a descending staircase pattern. The top block is being placed by the hand. The middle block is slightly offset to the right, and the bottom block is the widest and is centered. The background is a solid, bright orange color.

HABITS

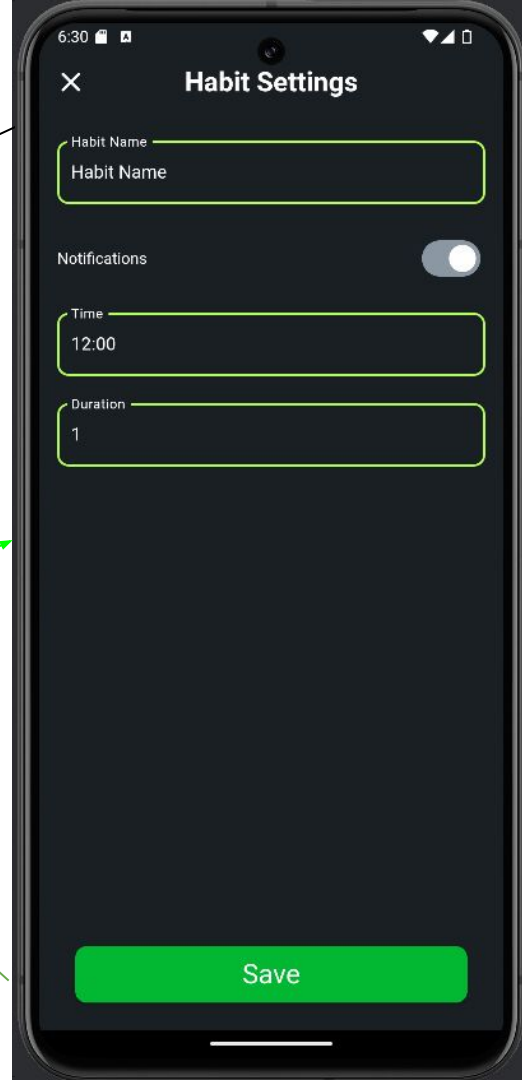

Features

The “Habit Helper” project allows a user to:

- Create a new habit;
- Delete a habit;
- Check in the habit completion;
- Set the amount of repetitions of the habit;
- And other functions for which we didn't have enough time.

Challenges & Solutions

We were given with only a week of the time(less than a week)

We had to learn how local storing works

We learnt how to create and modify widgets in general

Everything broke multiple times

Demo

Now, let us show how it works.
